## **DID YOU RECEIVE ALL THE PARTS NEEDED?**

Trane or American Standard Rooftop:

- YSJ\*\*\*\*S\* model with Symbio Controls
- FIAOPTN002\* Fresh Air Options Module (FAOM)
- FIAPWRX\*\*\*\* Power Exhaust Kit (if used)

MicroMetl Economizer:

- ECD-PR2BCCA-DTOB economizer for vertical ducting
- ECE-PR2BCCA-DTOB economizer for horizontal ducting
- 13M00220 panel for adding a Trane Power Exhaust (if used)

The Trane FAOM is required to interface an economizer actuator to the Trane rooftops Symbio controls.

These economizers have a bag of parts inside. The bag contains a necessary harness with a blue plug that inserts into the FAOM on one side with a black plug or spade connectors on the other for the actuator(s). It also includes a mixed air temperature sensor (MATS) that connects to the unit's discharge air temperature sensor (DATS) harness.

When adding a FIAPWRX\*\*\*\* Trane power exhaust kit, a 13M00220 panel from MicroMetl is required.

Contact Munch's Supply Commercial Sales team at (815) 215-5025 for lost or missing parts.

For help with assembly, wiring and configuration, see associated IOMs and Quick Start Tips. If you have further questions or concerns, contact the Technical Support Group at (815) 215-5020.
