Subject: **GFCI Breakers on Single-Phase Inverter Product**

This is an important Technical Service Bulletin to be carried out by trained and qualified service technicians. This notice provides guidance on the recommended selection of Ground-Fault Circuit Interrupters (GFCIs) for use in compliance with the National Electrical Code (NEC). Beginning in September 2026 (effective dates may vary by state), the installation of a GFCI will be required for outdoor unit installation of single-phase air conditioning equipment with a rated input current of 60a or less.

Based on the information currently available to Daikin, the following products have been identified as compliant solutions. Please refer to the table below:
